Production facility-1 located in the Çerkezköy Industrial Zone, include the main production building with nonsterile solid, semi-solid and liquid and sterile ampoule, vial, lyophilized, ready-to-use syringe and powder injectable production lines, inhaler and eye production divisions where BFS production lines are located, hormone division, penem and penicillin division, biotechnology and oncology division. In addition to the production zones, quality control, microbiology and R&D laboratories, an elevated storage, administrative offices and social facilities are also located in this vicinity. The production areas have been designed in accordance with the rules of cGMP (Current Good Manufacturing Practices)

NEW PRODUCTION FACILITY

Our new production plant is located at a distance of 120 km distance from Istanbul. The site spans a total area of 263,000 m² with 181,000 m² of covered region and a surrounding open area of 82,000 m². Our production facility offers high quality pharmaceutical manufacturing with specialization in highly effective and innovative medicines. It is designed and constructed in compliance with the industrial safety and regulatory standards set by the FDA. With 15 separate modular units comprising of Sterile Production Unit, Non-sterile Production Unit, Parenteral Drug Production Unit, Oncology Production Unit, Hormone Production Unit, Utility Unit and a separate area for Ampoule and Vial manufacturing; our facility stands out as one of the most future-oriented and digitally enabled pharmaceutical production sites with state-of-the-art-technologies, computer integrated manufacturing, and fully automated process and material flow.
